KEYWORD(S): THOMAS MORE

This Review notes the origins of the essays comprising the book of Papers to Read to the Thomas More Society of London by Richard O'Sullivan to be from the Thomas More Society, whose object was to study and discuss the intellectual and moral problems regarding the law and legislation. This is the same object pointed out by the Essay, especially when there is a need to entice the members of the bar to the truth that theirs is a profession chosen by Thomas More, who is a Saint and lawyer.
